## Discussion of Results

### ***Test Weight***

Lab G submitted high outliers recording at least 3.30 for all three samples. Lab F also submitted high results with mean differences of at least 1.00 produced for all three samples including an outlier recording 2.32 for sample 3. Lab E was the best performer this round producing an average absolute difference of 0.07.

### ***Impurities***

Lab G submitted significantly far from the mean for all three samples to produce the highest average absolute difference of 0.63.

### ***Oil Rapid***

Labs A and B submitted outliers recording 2.22 and 1.65 for sample 3. These two labs also submitted significantly high results of around 1.00% from the mean for samples 1 and 2 as well as producing the highest average absolute differences for Oil Rapid.

## 07/08 AOF Test Check Program Monthly Report

Round 8

JULY 2008

1/7/2008 – 31/7/2008

---

**Oil Solvent**

Lab G produced outliers for all three samples, generating a considerably high average absolute difference of 6.14. Note that results produced for Oil Solvent for lab G were significantly lower than that submitted for the other Oil methods.

**Oil Solvent (AOCS Method Am 2-93)**

Lab C produced the highest average absolute difference of 1.29. This was mainly due the lab producing an outlier for sample 2 recording a mean difference of -2.10.

**Oil SFE**

Only lab J submitted results for Oil SFE this round.

**Moisture Oven**

Lab D submitted significantly low results for all three samples this round with outliers produced for samples 2 and 3. Lab M achieved the best results to achieve a low average absolute difference of 0.06.

**Moisture Rapid**

Fairly good results were received overall for Moisture Rapid. Lab A submitted significantly lower than the mean for samples 1 and 3 but achieved a good result with a difference of only 0.05 for sample 2.

**Oleic Oil**

Lab B continues to produce outliers for Oleic Oil with outliers recording 1.90 and -4.99 produced for samples 1 and 2. The result produced for sample 3 was also significantly far from the mean recording a mean difference of -1.33. Lab G submitted an outlier for sample 3 recording a mean difference of -4.02. The lab however submitted fairly accurate results for samples 1 and 2 suggesting the error causing the outlier seen for sample 3 was restricted to that particular sample and not the actual method.

**Linoleic Oil**

Similarly to that seen for Oleic Oil, lab B also produced outliers for samples 1 and 2 suggesting sampling or preparation error. Good results were achieved by the remaining participants.

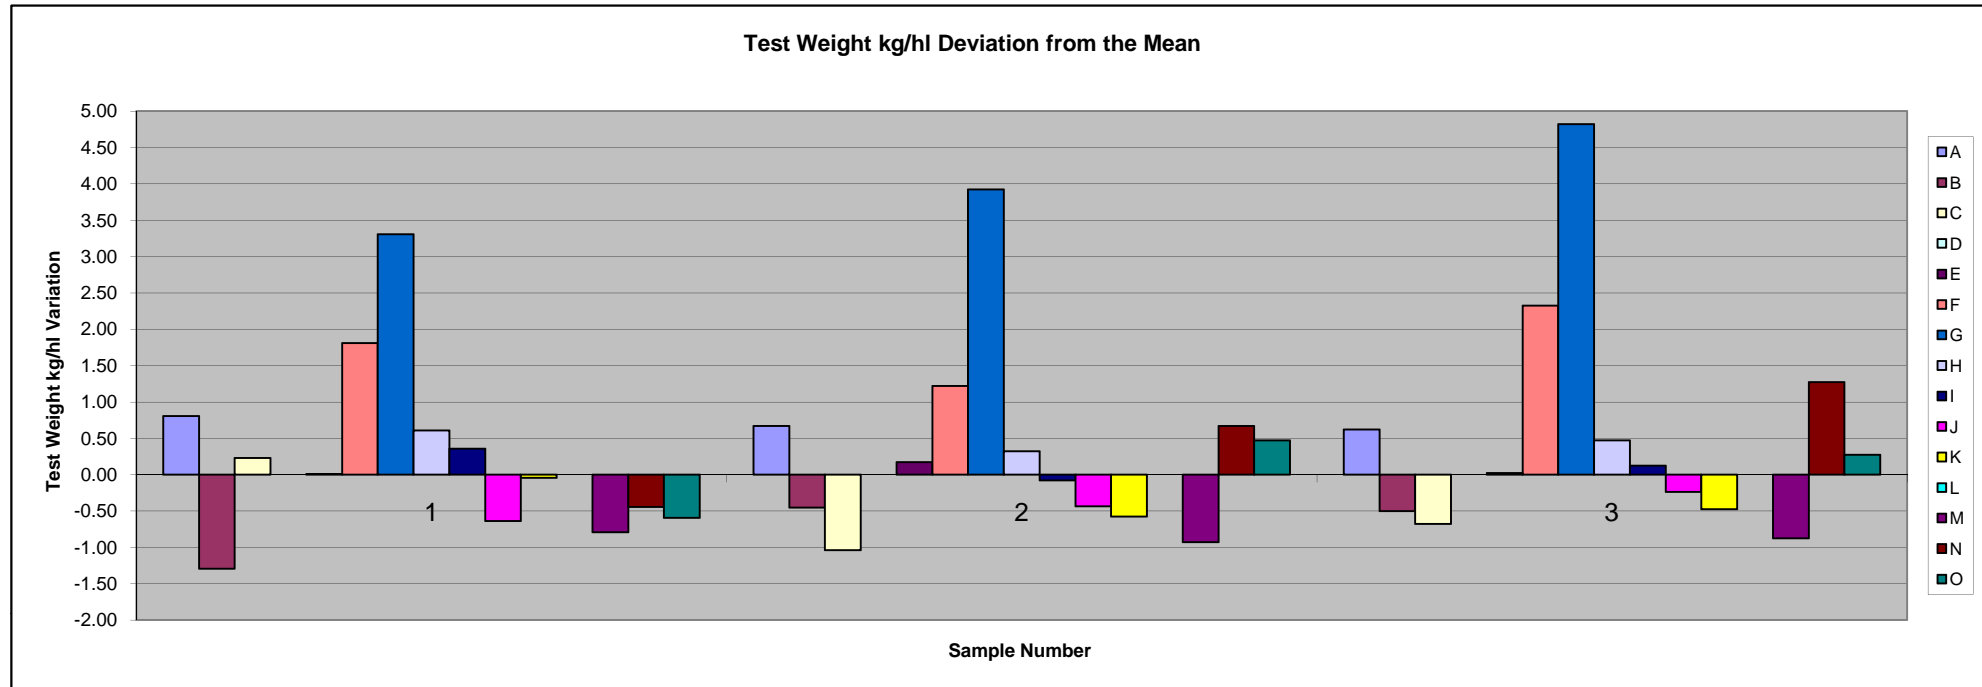

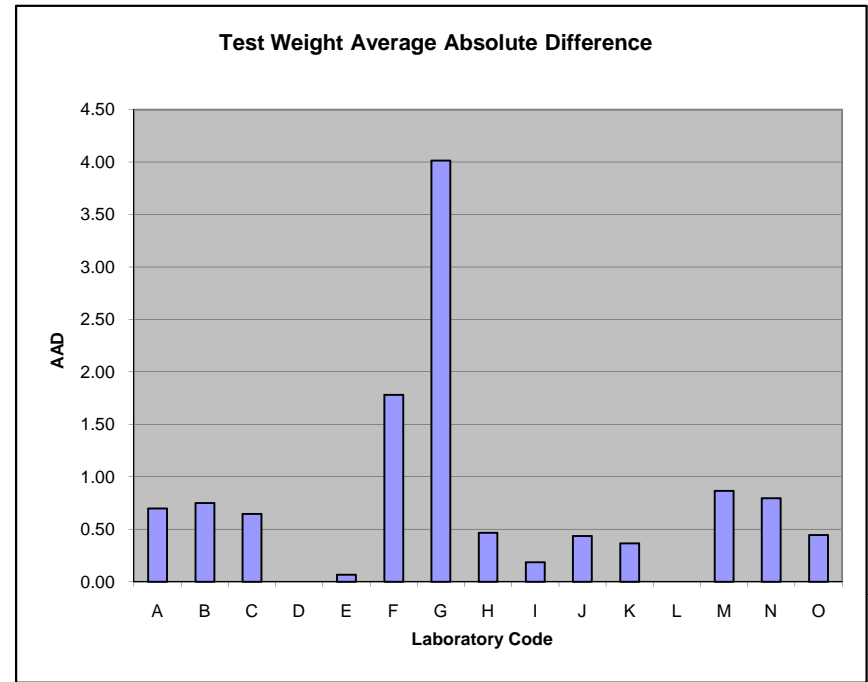

**Free Fatty Acid**

Excellent results were obtained for Free Fatty Acid with all labs submitting within +/-0.20 from the mean for all three samples. Well done.
