Farm waste management plan
(F-004)

Trading name: .....

Cropping season: .....

This plan identifies how waste material such as surplus crop protection products, plastic containers, oil residues, general household wastes and other wastes are managed on the farm. These must be disposed of appropriately and records must be kept on how and when they were disposed. This can be performed by completing the table below.

Type of waste material	Chemical name / components (if applicable)	Method of disposal	Date of disposal	Person responsible for disposal

Please use this form, and keep it on file, to record how you dispose of waste (if you do not have any evidence to show how you dispose of waste such as receipts).
You are only required to send this form to SGA if you are selected to be audited.
