2022 UCI Management

% Yield Increase over Control
2022 Cummins Fungicide Trial

2022 Other diseases

- Sclerotinia
- Alternaria

Plans for 2023

- Canola area expected to remain the same or increase
- While there is concern of growing Group B cultivars (because of increased blackleg levels), the confidence gained from 2022 will see these continued to be grown in 2023.
