Problems

Many Labs have left out normal tests they perform from month to month. This can be seen in the “Graphs for 2002_2003 Summary report” File. To get the most from participating in this program, all tests should be performed.

There has also been a problem with labs sending in results very late. To encourage all labs to perform tests in a timely manner, I will include the dates results were received on the monthly result sheet.

Apart from these two issues, there were no other problems.
